# Parent Data Calls for a Common Platform

Through parent/community forums, parents have reported that it was difficult to know:

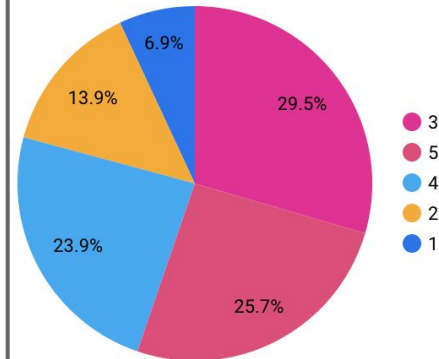

- where to find the assignments
- what the assignments were
- the expectations for the assignments

Especially when there was more than one child in a family (different systems by grade/school)

The expectations of remote learning have been manageable for our family.  
(1 - Strongly Disagree, 5 - Strongly Agree)

The expectations of remote learning have been clear for our family.

# What can Schoology Do?

## Teachers

- Organize units/playlists
- Can use apps inside of Schoology
- Data on student usage/participation/remote attendance
- Collaborative tools to promote blended learning (video, discussion boards, etc.)
- Resource bank for templates/content

## Students

- One place for all classes
- Within each class, there is a homepage that includes a link to folder/ assignment
- On assignment, the playlist provides directions and rubric
- Platform for collaboration, communication, accessing and turning in assignments

## Parents

- One place to see assignments for all children
- Subscribe to groups (e.g., school, sport)
- Participate as a learner (parent university)

# Why should I use Schoology?

It is a portal for each of your child's classes. If you have multiple children, you can access all of the classes that all of your children are taking in one easy place.

At NES, Schoology will link you to Playlists, Seesaw, videos from teachers, and other resources for your child.

As your child progresses through the grades, teachers will begin to use more and more features of Schoology including submitting assignments, gradebook, discussion posts, attendance, and much, much more!

# What will I see when I log in with my child at NES?
