The Model Evaluation Process for Superintendents

Standards, Indicators, and Rubric

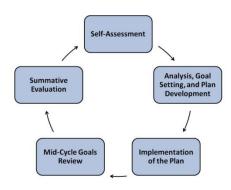

This Implementation Guide contains Standards and Indicators of effective superintendent practice that are based on the Standards and Indicators of effective administrative leadership practice detailed in the regulations. As required by the regulations, the Standards and Indicators have been turned into a rubric that specifies the elements of each indicator and then describes the elements at four levels of performance: *Unsatisfactory, Needs Improvement, Proficient,* and *Exemplary.*

A rubric is a critical component of the regulations, required for every educator. Rubrics are a tool for making explicit and specific the behaviors and actions present at each level of performance. They can foster constructive dialogue about performance expectations and how to improve practice. Used well, the rubrics prompt careful analysis, thoughtful discussion and constructive feedback. They may need to be adapted to match the job responsibilities of superintendents in large districts in which other district administrators may be directly responsible for some functions that in smaller districts are performed directly by the superintendent. These and other differences in local context can be explored in the discussion of the rubric. It should be noted that the superintendent can use the rubric as the starting point for developing expectations for assistant superintendents and other district-level administrators since many of the Indicators and elements appropriate for superintendents also are appropriate expectations for other district administrators. Collective bargaining is required in the case of evaluation of administrators not employed under individual employment contracts, as are superintendents, principals and some district administrators.

Annual Five-Step Cycle of Continuous Improvement

This Implementation Guide is organized around the five-step cycle required for all educators, a centerpiece of the new regulations designed to have all educators play a more active, engaged role in their professional growth and development.

Under the regulations, evaluation is an annual process beginning with self-assessment and concluding with summative evaluation and rating of the educator's impact on student learning. It also is a continuous improvement process in which evidence from the summative evaluation and rating of impact on learning become important sources of information for the superintendent's self-assessment and the district's subsequent goal setting.

¹ CMR 35.05 requires districts to have a system for evaluating superintendents that "reflects the purposes" in the regulation and "adapts the Standards and Indicators for Effective Administrative Leadership and the procedures" in the regulation to the role of superintendent.

For superintendent evaluation in the Model System, the annual cycle includes the following:

- Cycle Step 1: Superintendent's Self-Assessment. The superintendent conducts a self-assessment using the performance Standards and rubric, data about student learning, past progress on district goals (when available), the prior year's evaluation and rating, and other relevant evidence. Based on that assessment, the superintendent identifies at least two goals to propose to the school committee: one related to improving his or her own professional practice and one related to improving student learning.
- Cycle Step 2: Analysis, Goal Setting, and Plan Development. During a public meeting, the school committee and superintendent review the proposed goals, key strategies, and benchmarks of progress². In consultation with the superintendent and with the objective of achieving mutual agreement, the committee revises, as needed, and adopts at least one professional practice and one student learning goal.
 - In addition, the superintendent and school committee develop two to four district improvement goals with key strategies and benchmarks. Once adopted, the professional practice, student learning, and district improvement goals—with their key strategies and benchmarks of progress—become the Superintendent's Annual Plan. The plan serves as a basis for assessing the superintendent's performance.³
- Cycle Step 3: Superintendent Plan Implementation and Collection of Evidence. The superintendent implements the Superintendent's Plan, with assistance from the committee, as appropriate; school committee members and the superintendent individually collect evidence of progress on goals and performance against the Standards.
- Cycle Step 4: Mid-Cycle Goals Review. At a mid-cycle public meeting (or series of meetings), the superintendent reports on progress being made on the goals in the Superintendent's Annual Plan. The school committee reviews the report, offers feedback, and discusses progress and possible mid-cycle adjustments with the superintendent.
- Cycle Step 5: End-of-Cycle and Summative Evaluation Reports. The superintendent prepares an End-of-Cycle Report on progress toward each goal and performance against the Standards. In a public meeting, the school committee completes a performance review and End-of-Cycle Summative Evaluation Report assessing attainment of the goals and the superintendent's performance against the Standards (see Appendix E for step-by-step details of conducting the End-of-Cycle Summative Review).

Committees can determine when the annual cycle starts. For example, many will the want the superintendent to start the self-assessment process in the summer so that Step 2 in the cycle can begin at a summer retreat or at a school committee meeting in the early fall. Others may want to be able to set district goals in the spring, so they may want Step 1 of the cycle to begin in the late winter.

² Pursuant to the revised Open Meeting Law (c. 28, s. 18 2009), this component of the Superintendent evaluation and others, where noted, must take place in a public meeting. Further detail is provided in Appendix J of this Guide.

³ The Superintendent's Annual Plan is not the same as the District Improvement Plan described in MGL CMR 69 1I. One or more of the district improvement goals that appear in the superintendent's plan also may appear in the district plan, but the superintendent's plan is not intended to include every goal the school committee has identified in its district plan. Instead, the superintendent's plan identifies the three to six goals that will carry the most weight in assessing the superintendent's performance in that year. That said, school committees and superintendents are encouraged to coordinate these two planning processes.

Goals for Student Learning, Professional Practice, and District Improvement

Within the cycle, the Implementation Guide focuses attention on establishing three kinds of goals:

- Student learning goals
- Professional practice goals
- District improvement goals

As with all educators, goal setting focuses on both improving student achievement and developing professional practice. Including district improvement goals for the superintendent helps ensure that the superintendent evaluation process is closely coordinated with the overall district improvement planning process.

Rating the Superintendent's Performance Against Standards

Under the new regulations, the performance of every educator is rated against the four performance Standards defined in the educator evaluation regulations. All educators earn one of four ratings: *Proficient, Exemplary, Needs Improvement* or *Unsatisfactory*. It is expected that most effective educators will be rated Proficient on a standard rather than Exemplary because Exemplary is reserved for educators – superintendents included – whose practice in a particular area is so strong that it can be a model for others. Each rating has a specific meaning:

- Proficient performance is understood to be fully satisfactory. For the superintendent, and all other administrators as well as teachers, this is the rigorous expected level of performance. It is a demanding, but attainable level of performance.
- Exemplary performance represents a level of performance that exceeds the already high standard of Proficient. A rating of Exemplary is reserved for performance on an indicator or standard that is of such a high level that it could serve as a model for leaders regionally or statewide. Few educators—superintendents included—are expected to earn Exemplary ratings on more than a handful of Indicators.
- A rating of Needs Improvement represents performance that is below the requirements of a standard but is not considered to be Unsatisfactory at the time. Improvement is necessary and expected. For new educators, performance is on track to achieve proficiency within three years.
- Unsatisfactory performance is merited when performance has not significantly improved following a rating of Needs Improvement, or performance is consistently below the requirements of a standard and is considered inadequate, or both.

Rating the Superintendent's Impact on Student Learning

Under the regulations, all educators will eventually earn a rating of *low, moderate*, or *high* for their impact on student learning based on trends and patterns of growth in at least two state and districtwide measures of student learning, including MCAS Student Growth Percentile (MCAS SGP) data. The regulations require ESE to develop and disseminate by June 2012 guidance for districts about how to select or develop appropriate districtwide measures and how to analyze them to determine an appropriate rating. When that guidance is available, ESE will publish a supplement to the Model System. In the meantime, understanding how the MCAS Student Growth Percentile (SGP) differs from the MCAS Composite Proficiency Index (CPI) is essential to ensuring fair use of student learning measures in educator evaluation.⁴
