

FACILITIES DEVELOPMENT GOALS

The School Committee believes that any educational program is influenced greatly by the environment in which it functions. The development of a quality educational program and school facilities that help to implement the program must go hand in hand.

Therefore, it is the Committee's goal to provide the facilities needed for the number and educational requirements of students in the school system, and to provide the kind of facilities that will best support and accommodate the educational program. To best use local resources, it is the Committee's intent, wherever possible, to partner with the Massachusetts School Building Authority.

The Committee's first objective will be to develop a plan that eliminates overcrowding and minimizes the need for extended day programs and double sessions. Whenever possible, the cultural as well as educational needs of the community will be considered in planning facility expansions.

In planning facilities, the Committee recognizes that capital outlay funds are limited, and that priorities must be established to make the best use of the school building dollar. Recognizing that school facilities are long-term community investments, the Committee will develop projects that reflect cost-effective designs, are consistent with good engineering practice, and use high quality construction, with attention to current and future technological practices for students, faculty, and school staff.

Sites will be chosen to meet the educational need, maximize the use of any available community resources, and minimize any possible adverse education, environmental, social, or economic impacts on the community.
